

We claim as our invention:

1. A method for generating an itinerary for a party
visiting a facility having attractions comprising the steps
5 of

loading a set of data representing the facility and
the attractions;

collecting information about the party;

generating an itinerary using the information about
10 the party and the set of data representing the facility and
the attractions; and,
providing the itinerary to the party.

2. A method for generating an itinerary for a party
15 visiting a facility having attractions comprising the steps
of

loading a set of data representing the facility and
the attractions;

collecting information about the party;

20 generating an itinerary using the information about
the party and the set of data representing the facility and
the attractions, said itinerary specifying at least one
attraction being experienced at a scheduled time; and,
providing the itinerary to the party.

25

3. The method of claim 2 wherein at least one

attraction specified by the itinerary requires admission media; and, further comprising the step of providing admission media for the at least one attraction in the itinerary to the party.
